

Cisco Meraki MV Security Cameras for K-12 Schools

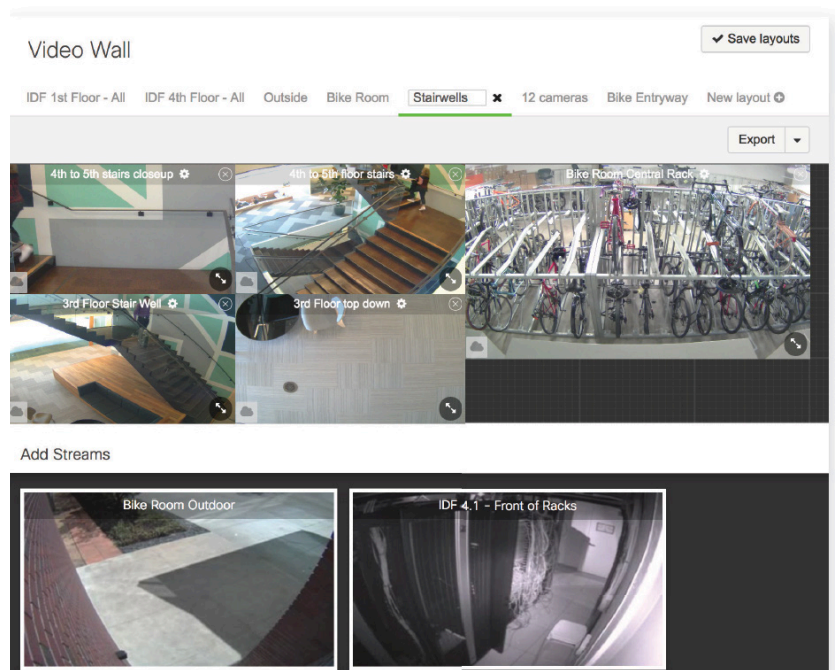

Intelligence, network security, and simplicity in a single package

Overview

Cisco Meraki MV security cameras are exceptionally simple to deploy and configure. Thanks to the direct integration into the Meraki dashboard, IT managers can make use of the camera's local storage and organizations can eliminate any costs or complexities that often come with traditional security cameras.

Like all Meraki products, MV cameras provide zero-touch deployment and remote, centralized management through the cloud. Using just serial numbers, an administrator can add devices to the Meraki dashboard and begin configuration before the hardware even arrives on site. Ship cameras directly to each school site and have them up and running quickly.

In the Meraki dashboard, users can easily stream video and create video walls for monitoring key areas across multiple sites without ever configuring an IP address or installing a plugin, while built-in analytics tools provide added value to organizations. Standardizing your school district's security camera deployment has never been easier.

Key Features

- Remote management through the cloud
- Intuitive dashboard interface which requires minimal training (great for school principals or security)
- Local video storage eliminates the need for a network video recorder (NVR) or server
- Automated, publicly signed SSL certificates
- Full disk encryption plus encrypted management and transport of data
- Built-in analytics tools included with standard licensing
- Granular access controls and user permissions
- Mobile app support for quick camera installation
- 3 year hardware warranty

MV K-12 Case Studies

New Albany Plain Local Schools 4,800+ students

The 5-person IT team at New Albany Plain Local Schools seamlessly manages over 220 MV security cameras deployed across their middle school and high school buildings, without having any in-house knowledge about cameras. Thanks to email alerts configured in the Meraki dashboard, the team is made aware of issues as soon as they occur and can fix them with ease.

“With Meraki, there’s no in house server to setup and maintain. With a small department, that’s one less thing that we have to do. The cameras are all on the network in one spot and accessible from anywhere.”

- Michael Voss, Director of Technology

Mount Vernon Independent School District 1,600+ students

Specialized access controls in the Meraki dashboard allow the security officer at Mount Vernon ISD to access MV security camera footage, without having to go through the IT team. Using the MV Motion Search feature, the officer was able to easily determine who backed into one of the coach’s cars in the parking lot, without sifting through hours of footage.

“We work closely with our school security officer to determine where to place the cameras and what level of dashboard access is needed for individual users. When we add new cameras, we simply tag to a specific school and our existing users automatically gain access to those specific cameras. It’s a no-brainer.”

- Woodrow Thomas, Director of Technology

Benefits of the Cloud

- Automatic firmware upgrades and bug fixes
- Hardware purchases gain value over time with access to new features as they’re developed
- No software, plug-ins, or drivers to download—everything is hosted natively in-browser
- Access all security cameras from anywhere in the world

Easy Licensing Model

- 1 license per each piece of hardware
- License includes 24/7 end customer support
- Provides access to the newest feature releases and bug fixes

The Meraki Product Portfolio

All Cisco Meraki devices are centrally and securely managed from the cloud using a single web-based dashboard. Our feature-rich, intuitive architecture enables customers to save time, reduce operating costs, and solve new business problems.

Wireless Access Points

Optimized for high-density with 802.11ac & Bluetooth

Security Appliances

Feature rich security & unified threat management platform

Switches

Layer 2 & Layer 3 switches for mission-critical networks

EMM

Unified management & control of thousands of devices

Communications

Provides simple VoIP phone management & eliminates the PBX

Security Cameras

Streamlines deployment & monitoring of video security systems
